<b>Companies Worked For</b>	<b>From – To</b>	<b>Roles</b>
Bank of America	August 2020 - Present	Web Developer
Dowden Consulting	February 2018 – July 2020	Web Developer

### Project Experience Details

#### **Bank of America, USA**

**August 2020 to Present**

#### **Role: Web Developer**

I work with teams to standardize the bank best practices and work alongside a team of other developers in creating, maintaining, and updating websites. Create documentations, assist and conduct training for teams ensuring sustainability and maintainability of team's daily activities for successfully client deliverables.

#### **Responsibilities**

- ♦ Website and software application designing, building, or maintaining.
- ♦ Code websites using HTML, CSS, JavaScript and jQuery languages.
- ♦ Planning website development, converting mockups into usable web presence with HTML, JavaScript and JSON coding.

- ◆ Provide front-end website development using WordPress and other editing software.
- ◆ Discuss site and app requirements with clients to produce actionable development plans and budgets.
- ◆ Built and style new mobile-friendly websites, transitioning legacy presentations to simultaneous easy-to-use versions.
- ◆ Develops user-friendly webpages based on the best practices for UI/UX, including mobile responsive website(s), speed and scalability
- ◆ Conduct functional testing over course of web development lifecycle.
- ◆ Conduct testing and review of website design for responsiveness, clarity and effectiveness.
- ◆ Responsible for design, programming, quality control, security, testing, debugging, and documentation tasks for assigned projects
- ◆ Identify problems uncovered by customer feedback, testing and correct or refer problems to appropriate personnel for correction.
- ◆ Integrating regulatory and compliance standards into product designs.
- ◆ Maintain banking application systems in operation, including providing IT (Information Technology) solutions, tasks related to debugging, identifying, troubleshooting application issues, and fixing the application issues.
- ◆ Collaborate with stakeholders during development processes to confirm creative proposals and design best practices.
- ◆ Experience with Content Management System (CMS)
- ◆ Work in Agile Environment, active participation in sprint planning and tasking, status update to the team on daily stand-up calls and huddle sessions with Mentor.

---

**Walmart, USA**

**February 2018 to July 2020**

**Role: Junior Web Developer**

As a junior Front-end web developer, I was responsible for assisting with the creation of websites and updating existing web applications using scripting languages. I work under the supervision of senior developers, assisting with coding, testing, design adjustments, and client reviews.

**Responsibilities**

- ◆ Worked in a cross-discipline team, using agile development methodology that requires active participation in all team's activities, focusing on a common team goal
- ◆ Supported the development that will grow business and introduce new trading opportunities in a timely manner
- ◆ Provided technical and operational support on all components of the trading platform and provide technical and operational support
- ◆ Developed user interfaces with modern JavaScript frameworks, HTML5 and CSS.
- ◆ Designed and implemented web components across new and existing designs.

- ♦ Analyzed, prioritized and problem-solved several tasks concurrently with minimum supervision.
  - ♦ Studied user requirements and implemented requirements into solutions.
  - ♦ Established and own our strategies for Security, Performance & Testing
  - ♦ Defined, measured and owned our Continuous Delivery strategy
  - ♦ Collaborated with project managers, testers, end-users, and distributors.
  - ♦ Worked in multi-project environment along with other intern groups. Team collaboration and effective communication with other Developers and Stakeholders.
  - ♦ Managed full-cycle design tasks, handling phases from conception to completion while maintaining guidelines throughout.
  - ♦ Designed and updated layouts to meet usability and performance requirements.
  - ♦ Ability to work with git and GitHub
  - ♦ Independent learner who loves to work in a fast-paced environment
  - ♦ Used user feedback to identify and correct problems with a client's website.
-
